HD Transmission

**Auto
Takeoff/Landing**

Lift off or land with a single tap.

**Low Battery
Protection**

Alerts go off when your battery gets low.

**Failsafe
Protection**

Land safely, even if you lose connection.^[6]

**Vision Positioning
System**

Smart tech that facilitates precise hovering.

Tello Robomaster TT

- *Open-source RoboMaster SDK (software development kit) based on Python 3.0*
 - *supports graphical programming, Arduino, MicroPython, DroneBlocks, and other programming methods*
- *Controller with built-in [ESP32](#) chip mounts to the drone*
 - *supports AP (Access Point) and Stations Modes*
- *14-pin (2x7) extension board lets you connect, debug, and supply power to third party sensors for additional drone applications*
 - *supports I2C, UART, SPI, GPIO, and PWM sensor interfaces*
- *Station Mode lets you connect multiple RoboMaster TTs to the same Wi-Fi router and control them*
- *LED indicator can be programmed to change color and flashing frequency*
- *8x8 programmable dot-matrix screen connects to open-source controller*
 - *adjustable overall and single-LED brightness*
 - *infrared ToF (time-of-flight) sensor accurately determines distances up to 3.9 feet*
- *Built-in barometer*

Specification

Item Brand: RCGEEK

Item Name: Tello Motor

Net weight: 10.78g/0.024lb

Gross weight: 19.08g/0.042lb

dimension: 156×7 mm/6.14×0.28 in

Motor interconnections

(Blue-black forward rotation)

(White and black reverse)

Inside the DJI Tello/Robomaster TT

RoboMaster TT App

Tello App

Tello App can experience more flight modes of Tello, with real-time image-transmission interface and camera, video-recording functions, which can easily experience the fun of aerial-photography. Tello app can also set the parameters of the drone, upgrade the firmware and calibrate the drone. Therefore, the Tello app is an essential software for using the Tello.

Requires iOS 9.0 or later.

[View Supported Devices](#)

Android version 4.4.0 or later.

[View Supported Devices](#)

Tello EDU APP

TELLO EDU App adds building block mode, formation mode and remote control mode to control the drone. The control method of the remote control mode is similar to that of the TELLO App, but the function is simpler; the building block mode allows you to use the building block programming to control the drone, which is convenient for easy learning programming anytime, anywhere. Increase the fun of the TELLO, and there are also many interesting levels to experience.

Requires iOS 9.0 or later.
